 swineperformance.
 vitaplus.com

Swine nursery feeds to promote gut health, stimulate early feed intake, and facilitate fast, efficient pig growth

Our philosophy

The Vita Plus Nursery Program is centered on five areas:

- Stimulate early feed intake
- Improve gut health and reduce the incidence of scours
- Facilitate easy diet implementation
- Promote pig growth and feed efficiency
- Formulate cost-competitive diets based on cost per pound of gain

Vita Plus conducts both internal and external product development research to develop our products in order to offer products that are proven to help you reach your production goals.

Vita Plus offers a variety of product options, including complete starter feeds in both pellet and meal forms, as well as base mixes, premixes, and specialty products. The Vita Plus nursery program is designed to meet the evolving nutrient demands of the growing pig and can be tailored to your farm-specific needs.

Complete starter feeds

- **Piglet Craze:** For **topdress, mat, and/or gruel feeding** intended for pre-weaned, newly weaned, hard-starting, or fall-behind pigs
- **First Feed:** **Pelleted feed for newly weaned pigs** containing ingredients that promote early feed intake, and the proliferation of beneficial gut bacteria; contains a high level of highly digestible ingredients
- **Launch:** **Pelleted feed intended as a second-phase feed for nursery pigs** containing ingredients that promote early feed intake, and the proliferation of beneficial gut bacteria; contains moderate levels of highly digestible ingredients
- **CGI Prepare:** **Meal feed intended for enterically challenged, newly weaned pigs;** contains specialty ingredients to promote feed intake, inhibit growth of pathogens, and enhance the immune system
- **CGI Enhance:** **Meal feed intended for enterically challenged pigs (to be fed subsequent to CGI Prepare);** contains moderate levels of highly digestible ingredients and contains specialty ingredients that inhibit growth of pathogens and enhance the immune system

Base mixes and premixes

- **Nursery Base 700 and 400:** Nursery pig base mixes formulated to enable on-farm mixing of nursery diets
- **Quarter Pack:** **Source of vitamins, trace minerals, and supplemental amino acids** to meet the nutrient requirements of nursery pigs, with added ingredients to promote gut health and improved performance
- **Vita Pig 8:** **Concentrated source of vitamins and trace minerals** to meet the nutrient requirements of nursery pigs, with added ingredients to promote gut health and improved performance

Add packs and other specialty products

- **Nursery Pro Add Pack:** Nursery add pack consisting of a blend of highly digestible proteins, milk carbohydrates, highly fermentable soluble fiber, and supplemental amino acids
- **Start Pro Add Pack:** Nursery add pack containing highly digestible animal proteins to promote feed intake and a healthy gastrointestinal tract
- **Nursery CGI Pro:** Used to manufacture a **second-phase complete feed;** contains a blend of specialty proteins, milk carbohydrates, and specialty ingredients to inhibit growth of pathogens and enhance the immune system
- **Piglet CGI Add Pack:** Nursery add pack used to manufacture diets for **enterically challenged nursery pigs;** contains highly digestible animal proteins and specialty ingredients to inhibit the growth of pathogens and enhance the immune system
