Balanced calf nutrition

Calf Glo is a 20/20 all-milk protein, insta-mix milk replacer. The high-quality fat and correct balance of amino acids allow for optimum weight gains and feed efficiency.

Selected ingredients for calf performance

- **Organic selenium:** Calf Glo includes organic forms of selenium derived from yeast that are more efficiently digested, metabolized and retained in the tissues of animals than inorganic selenium sources. Selenium is an essential trace mineral for your calves; it provides antioxidant protection, improves the immune response, and promotes growth and muscle development.
- **pH modifiers:** The lower pH in Calf Glo, compared with conventional milk replacers, limits proliferation of gut pathogenic bacteria, improving health and digestion.
- **Vitamin E and trace minerals:** Calf Glo's high levels of vitamin E and trace minerals offer an optimum level of disease protection.

Insta-mix manufacturing

The insta-mix manufacturing process assures rapid uniform mixing with ingredients staying in suspension.
