# MARQUEE

Marquee delivers electrolytes and a direct-fed microbial (DFM) to rehydrate calves, restore nutrients, and support gut function to reduce the severity and duration of scours,

## Easy-to-use calf electrolyte-DFM

- A highly palatable and easy-mixing formula in single-dose packaging ensures the correct dose is delivered to the calf.
- Marquee is packaged into boxes of 10 single-dose, 85-gram packets that are heat-sealed to protect freshness of ingredients.
- Mix with 2 quarts of warm water and provide up to 10 feedings per calf for calves showing signs of dehydration.

## Selected ingredients to rehydrate and support gut function

### Sodium and potassium

Replace key electrolytes lost through scouring

### Compound buffering system

Corrects metabolic acidosis caused by dehydration; acidosis keeps the immune system from functioning efficiently

### *Bacillus subtilis*

DFM inhibits *Clostridium perfringens*, *Salmonella* spp. and *E. coli*

### Amino acids

Aid in cell repair and enhance glucose absorption

### Fatty acids

Promote intestinal mucosal integrity and have natural antimicrobial properties to aid in inflammation control

### Glucose

Crucial for absorption of sodium and water and provides energy to fuel the immune system

### B vitamins

Stimulate metabolism and appetite

### Vitamin C

Antioxidant

### Betaine

Natural osmolyte that helps cells maintain normal hydration
