DAIRY GOAT Kid Program

VP Kid

VP Kid is a 24/25 kid milk replacer specially formulated to rival performance achieved when kids are fed whole milk. VP Kid provides an optimal nutrient profile and additives to support intestinal function and fuel exceptional growth in a variety of situations, including conventional feeding, automated feeders, and periods of thermal stress. VP Kid's excellent mixability makes it convenient and easy to use.

Selected ingredients for kid performance

- **High protein:** Supports increased structural growth with a blend of milk proteins from whey and skim milk sources
- **High fat:** Greater energy density to maintain positive energy balance
- **Medium-chain fatty acids:** Derived from coconut oil to promote high palatability and a pleasant aroma; provides antimicrobial properties and a quick source of energy
- **Yeast cell wall (MOS):** Binds pathogens and stimulates immune function
- **Organic trace minerals:** Se, Cu, Zn, Co, Fe, and Mn support growth and muscle development, energy metabolism, and immune function
- **Dextrose:** Lowers osmolality and lactose concentration, resulting in better digestibility while providing a rapidly available energy source
- **Deccox®:** Aids in controlling coccidia parasitic infection

18% Goat Starter Pellet

18% Goat Starter Pellet is a highly palatable micro-pellet, which is ideal for young goat kids to promote early starter intake and support gut development. 18% Goat Starter delivers optimum levels and sources of protein as well as high levels of essential minerals and vitamins. *Available with Rumensin®.*

16% Grower Pellet

16% Grower Pellet is a complete pellet formulated for ideal growth and development of dairy goat yearlings. The easy-to-feed and palatable pellet promotes consumption, reduces ingredient separation, and provides uniform consumption of nutrients.
