CALF GLO[®] 20/20 MILK REPLACER

Balanced calf nutrition

Calf Glo is a 20/20 all-milk protein, insta-mix milk replacer. The high-quality fat and correct balance of amino acids allow for optimum weight gains and feed efficiency.

Selected ingredients for calf performance

Organic selenium: Calf Glo includes organic forms of selenium that are more efficiently digested, metabolized and retained in the tissues of animals than inorganic selenium sources. Selenium is an essential trace mineral; it provides antioxidant protection, supports the immune response, and promotes growth and muscle development.

pH modifiers: The lower pH of Calf Glo, compared with conventional milk replacers, limits proliferation of gut pathogenetic bacteria, improving health and digestion.

Vitamin E and trace minerals: Calf Glo's high levels of vitamin E and trace minerals offer an optimum level of disease protection.

Insta-mix manufacturing: The insta-mix manufacturing process assures rapid uniform mixing with ingredients staying in suspension.

Available with:
Non-medicated
Bovatec[®]
Deccox[®]
