IKON 20/20 MILK REPLACER

Ikon calf milk replacer economically delivers a traditional 20/20 milk replacer formula with research-proven additives to support intestinal integrity, microbial ecology, and weight gain.

A “new age” 20/20 milk replacer

- Blend of whey, skimmed milk and plasma protein with supplemental lysine and methionine
- Enhanced vitamin and trace mineral nutrition plus technologies to support gut integrity and performance

Selected ingredients for calf performance

Quality protein: Supports increased structural growth with a blend of milk proteins from whey and skim milk sources

Plasma: Improves performance through immune challenges.

Balanced supplemental amino acids: Lysine and methionine promote efficient growth and decreased inflammation

Medium-chain fatty acids: Derived from coconut oil to promote high palatability and aroma; provides antimicrobial properties and a quick source of energy

Organic trace minerals: Se, Cu, Fe, Mn, and Zn support growth and muscle development, energy metabolism, and immune function.

Enhanced vitamin nutrition: Vitamins A, D, E, C, and B vitamins stimulate feed intake and growth

Yeast cell wall (MOS): Binds pathogens and stimulates immune function

Direct-fed microbials: Inhibits pathogens, produces enzymes, causes phagocytosis activation, and increases organic acid production.
